

What is MAGIC TAN?

In less than a minute the MAGIC TAN spray bronzing machine evenly sprays your entire body with a safe solution called DHA (sugar base). The fine mist of sunless DHA reacts with your skin to create an even, golden brown tan that will last a week or more. It works on all types of skin even if you have never been able to tan in the sun. It is 100% UV Free and works great on those who burn or only freckle. Unlike many self-tanning lotions it does not turn your skin orange, only a natural glowing bronze. You can tell your friends you've been on a tropical vacation.

What is TWILIGHT TEETH?

While becoming a "Bronze Beauty" you can now brighten your smile! You simply apply a non-toxic formula similar to what your dentist would use before entering the tanning bed. TWILIGHT TEETH comes with a mouthguard that holds your lips away from your teeth to expose your front teeth to the UV rays of the tanning bed. You will receive enough gel for 5 treatments leading you to a Whiter, Brighter SMILE!
